

IN-LINE FILTER HOUSING

1/4" CONNECTIONS

1/8" Exclusive design of connections grants the perfect tightening with O-ring seal only, no need for TEFLON tape.

MATERIALS

The finest, most advanced materials, constant focus on innovative processing technologies and ceaseless modernization ensure the absolute quality of our products.

1/4" CONNECTION

1/8" Exclusive design of connections grants the perfect tightening with O-ring seal only, no need for TEFLON tape.

RELIABILITY

Double O-ring ensure a perfect tightening.

EXCLUSIVE DESIGN

Made in Italy.

CUSTOM

A wide range of combination in colours is available on request for minimum quantity.

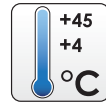

IN-LINE FILTER HOUSING

IN-LINE FILTER HOUSING has been designed for the use as a component in water treatment units or as a complete unit on its own. A range of available accessories and components is available to complete any kind of filtration unit.

A wide range of dedicated, patented filter cartridges allows the production of good and pure water in applications such as vending machines, fridge purifiers, water coolers, R.O. units pre- and post-filtration, point-of-use appliances, and many others.

The filters are made of completely non-toxic materials and are suitable to the use with drinking water, in compliance with the most stringent EU directives.

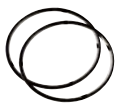

Model	in/out threads	Ø mm	length
IN-LINE FILTER HOUSING BW 1/4"	1/4"	60	335
IN-LINE FILTER HOUSING BW 1/8"	1/8"	60	335

cartridges available

<p>CPP In-line 5 micron SEDIMENT. Melt-blown polypropylene filter: high efficiency filtration of fine particles, rust, lime, sand, scales. Life-span: 3-6 months.</p>	<p>CA-SE In-line 5 micron CARBON BLOCK. Filtration of fine particles (rust, lime, sand, scales); reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 3-6 months.</p>	<p>CA-SE HF In-line 0,15 micron CARBON BLOCK. Micro-filtration with "hollow-fibre" capillary membranes (STER-O-TAP®) of very fine particles and some micro-organisms; reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 6 months. Maintenance: surface scraping every 2-3 months.</p>	<p>CA-SE HF-U In-line 0,02 micron CARBON BLOCK. Ultra-filtration with "hollow-fibre" capillary membranes (STER-O-TAP®) of very fine particles and micro-organisms; reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc.). Life-span: 6 months. Maintenance: surface scraping every 2-3 months.</p>		
<p>QA-AF In-line Container with strong anionic resin; reduction of Nitrates below the concentration recommended by WHO (10 mg/l) within the working limits. Life-span: variable.</p>	<p>QA-CF In-line Container with strong cationic resin; reduction of carbonates (Total Hardness) water softening. Life-span: variable. Maintenance: none. Max temp. 45°C. Max Cl: 0,1 ppm. Max Fe: 0,1 ppm.</p>	<p>QA-LM In-line Container with mixed bed resin; reduction of salts, demineralisation. Life-span: variable. Maintenance: none. Max temp. 45°C. Max Cl : 0,1 ppm. Max Fe: 0,1 ppm.</p>	<p>HA In-line Container with polyphosphate crystals; anti-scale and anti-corrosion protection of pipes, heating systems, washing machines, taps, showers. Life-span: 6 months. Maintenance: none. Max temp. 35°C. Max TH 500 ppm.</p>	<p>KDF In-line Container with metallic alloy with RedOx activity; reduction of chlorine (bad tastes, odours) and heavy-metals (Lead, Mercury, Chromium, etc.) with Bacteria-static effects. Life-span 6-9 months. <small>KDF® registered trade mark of KDF Fluid Treatment, Inc., U.S.A.</small></p>	<p>P In-line Empty container to be filled with treatment media. Max temp. 45°C.</p>
